

Malaysia Car Dashboard

An Interactive Analysis of Car Registration and Pricing Trends

Project Description

This project presents an interactive Power BI dashboard developed to analyse Malaysia's car registration and pricing data. The dashboard is based on publicly available data from the Malaysian government's official open data portal, **data.gov.my**, which publishes vehicle registration information maintained by the Road Transport Department (JPJ).

The dashboard allows users to explore different car manufacturers, models, colours, prices, and registration years through interactive visualisations. By transforming raw data into meaningful insights, the dashboard helps users understand vehicle popularity and pricing trends across different brands in Malaysia.

Project Objectives

The project was developed with the following objectives:

- To analyse car registration data in Malaysia.
- To compare vehicle prices across different manufacturers and models.
- To identify the most expensive and least expensive car models within the dataset.

Skills Demonstrated

1. Data Cleaning (Power Query)

Table: Table.RenameColumns(#"Inserted Merged Column",{{"Maker", "maker"}, {"Model", "model"}})

	maker	model	variant	Price (MYR)	Release Year
1	Perodua	Aruz	1.5 AV	77600	2i
2	Perodua	Aruz	1.5 X	72600	2i
3	Perodua	Bezza	1.3 AV (AT)	49800	2i
4	Perodua	Bezza	1.3 X (AT)	43680	2i
5	Perodua	Bezza	1.0 G (MT)	34680	2i
6	Perodua	Bezza	1.0 G (AT)	36680	2i
7	Perodua	Myvi	1.3 X (CVT)	49900	2i
8	Perodua	Myvi	1.3 G (CVT)	46800	2i
9	Perodua	Myvi	1.5 H (CVT)	53900	2i
10	Perodua	Ativa	1.0 X (Turbo)	62500	2i
11	Perodua	Ativa	1.0 H (Turbo)	67500	2i
12	Perodua	Myvi	1.5 AV (CVT)	58900	2i
13	Perodua	Ativa	1.0 AV (Turbo)	72500	2i
14	Proton	Iriz	1.6 Active (CVT)	54600	2i
15	Proton	X70	1.5 Standard	98900	2i
16	BYD	Atto 3	Extended Range (ER)	167800	2i
17	Proton	Saga	1.3 Premium S (AT)	44900	2i
18	Proton	Saga	1.3 Premium (AT)	41900	2i
19	Perodua	Alza	1.5 AV	75800	2i
20	Proton	Saga	1.3 Standard (AT)	36900	2i

2. Data Transformation
3. Data Modelling
4. DAX Measures

Expected Business Benefits

This dashboard provides several practical benefits:

- Reduces the time required to analyse large volumes of vehicle data.
- Improves understanding of market trends through interactive visualisations.
- Enables quick comparison between manufacturers and models.
- Supports data-driven decision-making for users interested in vehicle pricing and popularity.
